

Welcome to our Free Design Service.

Based on the information provided by yourself, our kitchen design team will provide you with a design and professional 3D images that will be a combination of both yours and our ideas to produce the ideal kitchen for you.

If you already have a kitchen design that you have either designed yourself or by another retailer and are happy with this design, please either email, fax or post this along with this information questionnaire.

If you are providing a hand drawn sketch on the attached graph paper, DON'T PANIC, you do not need to be Picasso!. A simple line drawing, indicating the sizes and position of doors and windows is all that is required from the drawing aspect. What is important is that the measurements on the drawing are accurate, as millimetres are important when it comes to designing your kitchen.
